Salmonella Stays Deadly With a 'Beta' Version of Cell Behavior

Michael Ibba, professor of microbiology and investigator in Ohio State's Center for RNA Biology, is senior author of a new study that finds Salmonella cells have hijacked the protein-building process to maintain their ability to cause illness.

Despite the growth of black studies over the last few decades, no academic journal has sought to look across the full range of the contemporary lives and experiences of black men. That is the thinking behind an ambitious new periodical, Spectrum: The Journal on Black Men.
