Molecular Genetics Minor:
Students can earn the Molecular Genetics Undergraduate Minor by completing the necessary prerequisites and the Molecular Genetics core series of classes. Whether under the quarter or semester system, the minor program must be approved by a major advisor from the Department of Molecular Genetics (see Advising to find your major advisor). Students who started the Molecular Genetics minor under the quarter system and graduate under the semester system should contact their Molecular Genetics major advisor for specific advice on completing the minor under the semester system.

Required Prerequisites:
- Biology 1113 and 1114
- Chemistry 1210 and 1220 (Honors or more advanced versions of these prerequisites may be substituted)

Required Core Courses:
- One of the following courses: Molecular Genetics 4500, 4500E, or 4606
- At least two of the following courses: Molecular Genetics 5607 (or 5607E), 5608 (or 5608E), or 5645

Elective courses (core plus electives must total at least 14 semester hours):
- Molecular Genetics courses: 2220H, 4503, 4591S, 5193, 5194, 5601 or 5602, 5632, 5650
- Other Life Sciences courses: Microbiology 4130, 5161H
- No more than 3 semester hours graded as S/U can count toward the minor.
- Other elective courses may be substituted with permission of advisor.
