A Landscape Management and Design minor is useful for students who plan to seek employment in areas where knowledge of landscape plant identification and cultural requirements, landscape design principles, as well as a basic understanding of plant growth and development are required for decision making. Students taking this minor will gain insights into the environmental, genetic, and cultural factors that influence plant growth as well as the principles of landscape design including “right plant, right place”. Such insights will enable the student to anticipate and respond to plant interactions with environmental factors and to predict plant growth development in a landscape over time.

A Landscape Management and Design minor consists of 13-15 hours selected as follows (at least 6 credits must be taken at the 3000 level or higher):

**Required: 3-4 hours**
HCS 2201 (4) or 2203 (3)
