A minor in Animal Pre-Veterinary Medicine is for students who wish to develop a greater understanding about the impacts of health on beef, dairy, horse, poultry, sheep, swine and/or companion animal production. This minor will appeal to students with interests outside the Animal Sciences major who are pursuing a career in veterinary medicine.

**Prerequisite Course for the Minor:**
Biology 1101 or 1113 or 1113H (4)

**The Animal Pre-Veterinary Medicine minor consists of a minimum of 15 credit hours from the courses below.**

**Required:**
ANIMSCI 2200.01 (3), 3140 (3), 3170 (3), 3270 (2)

**Required Electives: Minimum of 5 credit hours**
ANIMSCI 2000 (2), 3100 (3), 3130 (3), 3147 (2), 3160 (3)

The minor is not available to students majoring in Animal Sciences.

At least six (6) credits must be at the 3000 level or above.
