

STUDENT CAREER AND PROFESSIONAL SUCCESS

At the College of Arts and Sciences, we believe our students deserve every opportunity to pursue their passions. That's why we've reimagined our career and professional development services, to ensure that we continue to meet the evolving needs and expectations of 21st century students.

Our vision is for College of Arts and Sciences students to be skilled, supported and empowered as they prepare for their futurezvv.

In autumn 2017, our former Office of Career Services re-engineered its vision and programs to become the College of Arts and Sciences Center for Career and Professional Success ("Career Success"). Career Success helps our students as they explore various pathways and design their lifetime of opportunity.

To position students competitively and help them build a strong network, Career Success galvanizes a cohort of engaged professionals including alumni, employers, industry experts and the Ohio State campus community.

Now, we invite you to join us as we help our students prepare for their professional lives.

A gift will help the College expand meaningful relationships between students and employers, and give our undergraduates and graduates the resources they need to succeed.

Your generosity today will prepare our students for professional success tomorrow.

HELP FOSTER A STUDENT'S LIFETIME OF OPPORTUNITY

INTERNSHIP SCHOLARSHIPS

Reduce financial barriers and support students in pursuit of a wide range of experiential opportunities, such as unpaid internships, research and more.

CAREER TREKS AND JOB SHADOWING

Connecting our alumni and employers with students is essential. Career Treks and job shadowing occurs in various locations locally, regionally and nationally, exposing students to the professional world.

MENTORING

The ASC Match Mentor Program is designed to match alumni and students in a one-to-one professional relationship. Alumni can pay it forward by giving their time and talent to help students learn about the value of their Arts and Sciences education in the workplace.

SUPPORT STUDENTS IN NEED

The College aims to support students who are in need, specifically assisting them with the purchase of professional attire and memberships, in order to connect to regional or national networks that foster career growth.

INNOVATIVE LEARNING LABS

Professional learning labs allow students to test and translate new ideas while being mentored by industry partners or distinguished alumni. Designed to foster the acquisition of real-world skill sets, labs include topics like entrepreneurship, consulting, women working in male dominated fields, or next-gen skills for first generation students.

THE COLLEGE OF ARTS AND SCIENCES CENTER FOR CAREER AND PROFESSIONAL SUCCESS

**"[CAREER SUCCESS]
DOES AN AMAZING JOB
setting up opportunities to
network with alumni and
professionals. I have made
dozens of connections,
which have helped me
land internship offers and
progress in my career."**

**–Casey Sudzina
Strategic Communications**

STEPHANIE NNADI
Political Science, Psychology (majors)
Criminology (minor)

"My internship gave me a deeper understanding and appreciation for my field. Experiences like this are beneficial to all students. Paid positions would encourage more individuals to take their learning outside the classroom."

MARISSA SMITHINSKY
International Relations and Diplomacy, French (majors)
Human Rights (minor)

"My internship helped me become a leader. It showed me that I can help others. Unfortunately not all employers recognize the dedication that goes into unpaid internships. A paid experience would help students like me prove we are qualified and ready to work."

AZRIEL KRONGAUZ
Master of Applied Statistics

"The externship was well worth my time. It helped me understand [the company's] business, gave me insight into what data scientists do there, introduced me to the company culture, and helped me make connections. I will definitely keep an eye open for future externship events at other companies that I'm interested in."

ABBEY TURNER
Bachelor of Fine Arts (major), Photography (focus)

"The career event I attended was inspirational. Meeting with local Columbus entrepreneurs gave me insight on the triumphs and struggles of being a small business owner. This event gave me the confidence that the entrepreneurial path is the one I am excited and ready to take after graduation."
