The EEDS minor provides a multidisciplinary approach with a focus on the economic, business and social change aspects of sustainability. This minor responds to the emergence of sustainability as an important competency for many types of jobs in the private, public and non-profit sectors. Through the EEDS minor, students obtain knowledge of sustainability concepts and methods that complement their major program of study in a variety of natural, physical, engineering and social science disciplines. The EEDS minor curriculum is comprised of core courses from the EEDS major and includes a range of courses that can be selected by students to count toward the minor. These courses are designed to provide a foundation in sustainability concepts and theory related to economics, business, sociology and community and international development. The EEDS minor will assist students in a wide variety of OSU majors to be even more “job ready” for the ever-changing employment marketplace.

A total of 15 semester hours are required for this minor.
