A Minor in Air Science is for students who seek to improve and challenge themselves on a daily basis. Students will experience realistic and dynamic training designed to teach values and skills essential for leaders in every organization. Courses are "hands on," with an emphasis on leadership application through practical experience. Students practice techniques while assigned to leadership roles within the cadet wing organizational structure. In addition, courses are designed to instill professional ethics and familiarize participants with principles of physical fitness and a healthy lifestyle. Ultimately, the program explores the dynamics of leading in a complex environment, introduces challenges across the national security landscape, and prepares students to analyze, manage, and adapt to change. The end state of the program is for students to be adaptive leaders with confidence in their ability to make decisions and motivate subordinates.
