The interdisciplinary minor in Science and Technology Studies (STS) provides students with the tools to understand and evaluate the social contexts that give rise to particular scientific and technological developments, and the social consequences of these developments. It is designed for STEM majors who wish to consider the ethical, political, and social dimensions of the fields in which they work, and non-STEM majors who wish to understand and evaluate the ways sciences and technologies shape human possibilities in particular historical and cultural circumstances.

No more than 9 credit hours may be taken in one Department.
